CAREER OBJECTIVE

Senior Software Engineering student at KFUPM with hands-on experience building full-stack web applications using React, Node.js, and MongoDB. Currently expanding into cloud technologies through AWS and GCP training. Seeking a 2-month summer training opportunity to apply my web development and system design skills in a real engineering environment.

Education

King Fahd University of Petroleum and Minerals (KFUPM), B.S. in Software Engineering –Senior Student GPA: 3.1 / 4.00 Expected Graduation: December 2026	2021 – present
Al Nabigha Al Jaadi High School, Medina, High School Certificate, GPA: 99/100 (2021)	2018 – 2021

Relevant Coursework

- Introduction to Artificial Intelligence (COE 292)
- Introduction to Data Science (ISE 291)

Projects

Qudrat Test Preparation Platform GitHub 🔗 SWE 363 – Web Applications Development Course Project • Gathered and analyzed user requirements and translated them into system features for a 4-member team project • Designed the system architecture for a full-stack Qudrat exam preparation platform serving 3 user roles (student, teacher, admin) • Built the front-end using React with a responsive and interactive user interface • Developed the back-end using Node.js and implemented 22 RESTful API endpoints • Used MongoDB with 6 data models to store users, questions, exams, attempts, saved questions, and reports • Solely designed and developed the admin dashboard, including user management, question review workflow, and global announcement system • Achieved 100% API test coverage using Postman across authentication, training, exams, and reporting systems • Used Git & GitHub for version control and project management.	
Score Tournament Application for KFUPM Students GitHub 🔗 , Database Systems Course Project • Analyzed system requirements and designed the full database architecture for a 2-member tournament management project • Designed and developed a web application with 9 pages to manage teams, players, and tournaments • Implemented features for tournament browsing, team applications, and status tracking using React + TypeScript + Supabase • Developed player statistics views including top scorers and red card listings • Solely built the entire admin panel — 7 pages including tournament creation, player approval, captain selection, and match details • Applied database design principles with TypeScript to ensure data consistency and type safety throughout the app • Used Git & GitHub for version control and project tracking.	
Flight Status Prediction Data Science Project, ISE 291 – Introduction to Data Science • Applied machine learning classification techniques on a real-world flight dataset to predict flight status (delayed, cancelled, on-time) • Performed data cleaning, preprocessing, exploratory data analysis, and model evaluation using Python and Jupyter Notebook	

Experience

Course Grader (Part-Time), SWE 363 – Web Applications Development, KFUPM Term 252 • Graded assignments and projects for 150+ students across a web applications development course • Provided written feedback on student submissions to guide improvement • Collaborated in a team of 8 graders, coordinating on grading standards and consistency • Handled regrading requests, reviewing appeals and ensuring fair evaluation • Added comments on submissions to ensure adherence to course requirements	
Volunteer – KFUPM Community Service Contributed to community initiatives including park restoration and mosque cleaning as part of organized teams (2022–2023)	

Activities & Achievements

- Active member of KFUPM Volleyball Team | Winner – KFUPM Volleyball Tournament (Ramadan 2024)

Skills

Technical Skills

- **Full-Stack Development:** React, Node.js, REST APIs, MongoDB
- **Languages:** JavaScript (proficient), Python (data/AI libraries), Java (academic), C++ (in progress)
- **Tools & Platforms:** Git & GitHub, Postman, Supabase, Vite
- **Cloud (Learning):** AWS, GCP
- **Other:** Basic UI/UX Design, Software Development Lifecycle

Soft Skills

- Teamwork & collaboration
- Strong communication skills
- Fast learner & adaptable
- Ability to work under pressure
